Main Office: (423) 710-1476
Service Department: (239) 322-2103
Sale/Administration: (239) 826-1829

IMPORTANT - BEFORE USING:

DO NOT place your unit on your rig or in the field without making sure the unit is working 100% per start-up instruction included in your packet. Shipping damages may occur and your warranty DOES NOT cover shipping damages.

Our Carrier covers the shipping damages should they occur. Any unit that has been used will not be considered for insurance or claim. **There are ABSOLUTELY no refunds**, TCB will **REPAIR/REPLACE** if there is a warranty issue with your CB8000, that our Service Department feels requires special attention. If you are instructed to return to the system for repairs/warranty, you will need to obtain an RMA# from TCB, to return unit. Please visit our website at www.tennesseechillbox.com for instructions on how to return ship and return address.

When you receive your CB8000 System, and you feel it is not working properly, or you have any questions with the start-up procedure, please contact the Service Department immediately or the Main Office. We are here to HELP!

CLEANING & MAINTENANCE:

It is your responsibility to maintain your system and filter, (wash daily if needed or air blow dirt and debris to properly clean filter) and **REPLACE** front filter when needed (approximately every 30-60 days depending on use and care) available directly from Tennessee Chill Box. Your side vents on the unit need to be kept clean and free of dust and debris daily, or depending on usage. Also, periodically tilt your unit forward slightly, and with a water hose, spray very lightly starting at the top of your front intake air conditioning coil, moving side to side, until you reach the bottom of the coil. Then to blow off the excess water from the coil until dry. Proceed with normal start up procedures. This will maintain and extend the life of your system. Repeat as often as you feel necessary. If you have any questions on how to follow this procedure, please feel free to phone the Service Department for directions. With proper care and maintenance of your system, it will offer you the BEST quality of cool fresh air for your breathing needs.
